

HRISLink is designed to efficiently fulfill the compliance and management requirements of tracking and reporting extensive data on employees. Our system provides you with ability to track unlimited amounts of data while providing the flexibility to accommodate industry and government specific requirements.

HRISLink has a central repository for storing company specific documents that are easily accessible by all users. The rules-based notifications allow users to customize announcements to their company's needs. Reporting in HRISLink is simple, flexible and powerful – including the ability to incorporate charts and graphs.

Dashboards provide “at a glance” overviews detailing important information to the user. From simple to complex, HRISLink's workflow processes can be automated and tracked to ensure you have a full history and every task gets completed.

## Document Management

Store and distribute company documents online utilizing incorporated role based security.

## Customizable

Add unlimited data tracking fields to fully meet the needs of your clients. Build policies to generate email notifications. Create workflows to insure processes are completed.

## Dashboards and Custom Reporting

Build reports (via point and click wizard), graphs, cross-tabs, summaries and more. Automate regular processes and schedule reports that are generated and sent directly to your email.

## Integrates to 3rd Party Applications

Full API capability to integrate 3rd party applications such as, payroll, ERP, benefits, on-boarding and more.

Use the power of **HRISLink** today!

## What is HRISLink?

- A customizable Human Resource Information System package written for the business with 10 to 500 employees; written by HR and payroll industry veterans and designed with the payroll service bureau in mind.

## How can HRISLink help your business?

- Provides your clients a branded solution normally only available to midsize and enterprise size businesses.
- Increases client retention and incremental revenue.
- Easily interfaces with 3rd party applications via standard web services.
- Built from the ground up for the web and multi-tenancy.

## Questions & Answers about HRISLink

### Do you integrate with our payroll software?

- We are in discussions with all payroll software platforms. Our goal is to provide a solution that is integrated with your payroll platform. HRISLink itself is open to integrate with ANY platform.

### Can you integrate with other applications?

- Yes, HRISLink has complete REST and SOAP web service capability.

### When can I get started?

- NOW! We are currently looking for clients interested in implementing and providing feedback.

### How does the revenue share work?

- We bill you per active employee per month (pepm). Your participation level, reseller vs. referral, determines your pepm price. You, in turn, set your own pricing and charge the client.
